

Vivid Workshop Organiser™

Vivid's new management program

Vivid is introducing its new management program: Vivid Workshop Organiser™. Vivid Workshop Organiser™ is completely integrated with Vivid WorkshopData ATI™ and Vivid TruckData™

Why a management program?

There are already so many impressive management programs available in the market. We agree, there are management programs in abundance and they offer lots of functionality. But it is just this overload of functionality that make most of the available programs so complicated, often too complicated.

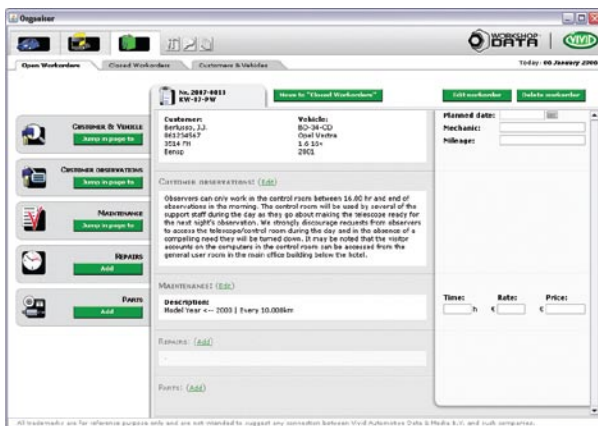

Our aim has been to build a simple management program that can create a work order and cost estimate in a few simple steps.

Basic requirements

Vivid Workshop Organiser™ truly is simple and easy-to-use but at the same time offers all the basic requirements important for a Workshop management program.

- ▶ An overview of planned, scheduled and past due work orders in your workshop
- ▶ A Customer & Vehicle database
- ▶ The possibility to easily create a cost estimate from a work sheet, including maintenance & repair jobs.
- ▶ A repair history of all cars

The basic idea is that after you select a car, it is immediately linked to the right maintenance- and repair data, spare parts and repair times.

Link to TecDoc GenArt reference

All our Maintenance data & Repair Times jobs are linked to the TecDoc GenArt references. When you add a service schedule or repair times data to a work order, these are imported from Vivid WorkshopData ATI™ into Workshop Organiser. No hassle to find the right maintenance and repair data.

Workshop Organiser offers various other smart links that allow users to:

- ▶ Open the right car in your parts catalogue.
- ▶ From your parts catalogue add the related spare parts for the job and in a few easy steps you create a work order.

What more do you need?

Licence

Since WorkshopOrganiser is tightly integrated with our Repair Times module we deliver the program for free in combination with a licence for our Repair Times Module. For other licences, we deliver Workshop Organiser according to our most current price list.
